### MARKDOWN SYNTAX SAMPLE

[Markdown syntax reference](#)

A First Level Header

#### 3.1 A Second Level Header

Now is the time for all good men to come to the aid of their country. This is just a regular paragraph.

The quick brown fox jumped over the lazy dog's back.

##### 3.1.1 Header 3

This is a blockquote.

This is the second paragraph in the blockquote.

#### 3.2 This is an H2 in a blockquote

TABLE

Colons can be used to align columns.

Tables	Are	Cool
col 3 is	right-aligned	\$1600
col 2 is	centered	\$12
zebra stripes	are neat	\$1

There must be at least 3 dashes separating each header cell. The outer pipes (|) are optional, and you don't need to make the raw Markdown line up prettily. You can also use inline Markdown.

Markdown	Less	Pretty
<i>Still</i>	renders	<b>nicely</b>
1	2	3

#### CODE BLOCK

This is a normal paragraph:

```
This is a code block.
```

One level of indentation — 4 spaces or 1 tab — is removed from each line of the code block. For example, this: Here is an example of AppleScript:

```
tell application "Foo"  
  beep  
end tell
```

#### Codeblock

```
function test() {  
  console.log("notice the blank line before this function?");  
}
```

#### LINK

This is [an example](#) inline link.

[This link](#) has no title attribute.

### 3.3 Automatic link

<http://example.com/>
