3 Markdown cheatsheet

MARKDOWN SYNTAX SAMPLE

Markdown syntax reference

A First Level Header

3.1 A Second Level Header

Now is the time for all good men to come to the aid of their country. This is just a regular paragraph.

The quick brown fox jumped over the lazy dog's back.

3.1.1 Header 3

This is a blockquote.

This is the second paragraph in the blockquote.

3.2 This is an H2 in a blockquote

TABLE

Colons can be used to align columns.

Tables	Are	Cool
col 3 is	right-aligned	$1600
col 2 is	centered	$12
zebra stripes	are neat	$1

There must be at least 3 dashes separating each header cell. The outer pipes (|) are optional, and you don't need to make the raw Markdown line up prettily. You can also use inline Markdown.

Markdown	Less	Pretty
Still	`renders`	**nicely**
1	2	3

CODE BLOCK

This is a normal paragraph:

```
This is a code block.
```

One level of indentation — 4 spaces or 1 tab — is removed from each line of the code block. For example, this: Here is an example of AppleScript:

```
tell application "Foo"
    beep
end tell
```

Codeblock

```
function test() {
  console.log("notice the blank line before this function?");
}
```

LINK

This is an example inline link.

This link has no title attribute.

3.3 Automatic link

http://example.com/

4 Quick reference

....

Quick reference

4.1 Comandi MAVEN per creazione sito

Task	Comando	Output root
Creazione documentazione	`mvn clean site`	${project.basedir}/target/site
Pubblicazione su repository remoto	`mvn clean site-deploy`	Github /AzureDevops

4.2 Doxia

Doxia formati di riferimento

4.3 Configurazione plugin checkstyle

https://checkstyle.sourceforge.io/version/4.4/5.x/config_javadoc.html

5 Esempi mermaid

....

Esempio con Mermaid

- con mermaid.js
